

## Designs

2D images or 3D CAD files

## Model

Pick a model (yours or ours)

## Present

Virtual photoshoot is complete!

### Here's how it works:

1. Students log into StyleScan studio and have the option of selecting a model from our database or utilizing one of their own choosing.

2. After uploading an image of their garment, they digitally map it to the model using our proprietary creative tool kit.

3. Keep in mind- the deeper value lies in the fact that the garment does not need to physically exist- it can be a virtual digital prototype, yet with our software it can be displayed on real human models!

**FREE TO USE**

**NO INSTALLATION**

**500+ REAL MODEL IMAGES**

### StyleScan is a new digital styling technology allowing students to dress real people virtually!

Our software is utilized by major brands such as Levi's, and leading manufacturers carried by Revolve, Neiman Marcus, and Nordstrom.

We are thrilled to announce the launch of our educational initiative, which grants fashion students free access to StyleScan software.

Our mission is to enable young talents to learn technology being utilized by large established corporations, optimizing their education and career development.

StyleScan offers students the opportunity to take advantage of cutting-edge fashion solutions, facilitating a way of learning the ins-and-outs of merchandising tools and prepare exceptional visual presentations.

StyleScan has already granted its educational sponsorship to prestigious institutions such as The Fashion Institute of Technology in NYC, the Academy of Art University in San Francisco, and Missouri State University. These universities have requested 1,600+ StyleScan software licenses for students, which will be distributed as part of our Student Initiative, at no cost.

As a woman-founded startup, StyleScan is an innovative and progressive company that values inclusivity, sustainability, and social responsibility within the fashion industry. Our model database includes a range of skin tones, sizes, and body shapes to choose from. Students can also use photos of themselves, their friends, or influencers.

Our ultimate goal is to become the standard of digital styling technology for businesses and universities.

Join our initiative supporting young and emerging talents in the fashion industry!
